Cloud Based Solution to manage NFC tag ID's

Cloud Based Solution to manage NFC tag ID's and their identification and authentication processes:

- Multiple tag formats and encryption mechanisms (NXP NTAG, NXP Mifare, NXP NTAG DNA, NXP ICODE, NXP SLIX, Silicon Craft SIC43NT, Wisekey Vault IC, Electronic Marin Echo-V. QR Codes & Secured QR Codes)
- Key and ID exchange with tag manufacturers with direct and secured interfaces
- Production and logistics software systems of the brand IT systems can access and populate the ID repository via a Production API.
- Consumers can read and authenticate tags via the mobile libraries available on iPhones and Android smartphones.
- Scanning possible with mobile web, Apps and Wechat.
- Short URL dynamic redirections with the possibility of passing specific parameters (product serial number, JWT, etc).
- Comprehensive SLA with servers in Europe, China and in the US.
- On premises model possible.
